

Work Experience

Career Break

Jan 2026–Present

- **Transitioned from full-time employment via a company-wide layoff**, electing to take a structured sabbatical to recharge and evaluate long-term career directions.
- **Dedicated the sabbatical period to advanced technical upskilling**, actively mastering core **System Design** methodologies, architectural patterns, and modern framework ecosystems.

Software Engineer II

Phaidra

Jul 2023–Jan 2026

Product Engineering team

Remote

- **Architected an AI "Insights" engine via LangChain.js**, migrating core charting to AG Charts to process 1M+ telemetry points.
- **Engineered a state-driven timeline system** to visually surface telemetry data gaps and manage custom timestamp filters.
- **Designed Atlas platform core state architecture via Redux** for constraint ordering, async polling, and version rollbacks.
- **Owned API contract specifications and unblocked QA** by scaling automated Cypress and Playwright E2E test pipelines.
- **Directed end-to-end incident response and operational tracking** across systems on critical on-call rotations.

Software Engineer I

Dec 2021–Jul 2023

- **Led the full React portal architectural rewrite**, entirely replacing a broken and unmaintainable legacy contractor codebase.
- **Eliminated UI crashes on 10k+ node data tables** via client virtualization, paginated search, and low-code MUI compilers.
- **Maintained CI/CD pipeline stability** by fixing broken builds and writing robust Jest / React Testing Library suites.

LFX Mentee

Thanos, CNCF

Sep 2021–Nov 2021

- **Optimized query reliability across distributed cloud storage workflows** by implementing a critical client-side caching layer in Go for the Thanos Store component.
- **Reduced memory overhead and streamlined cache eviction policies** by successfully refactoring the storage engine to utilize galaxycache following technical maintainer architecture reviews.

Software Engineer

Reliance Jio

Jul 2021–Nov 2021

JioMart B2B team

Mumbai, India

- **Re-engineered the native JioMart B2B Android app** into a cross-platform TypeScript web app to scale mobile and web user access.
- **Standardized product interface design** by building core onboarding modules and a localized UI design system.

Education and Certifications

- **B.Tech. Computer Science**, IIIT Gwalior, India. CGPA: 8.08/10 2017–2021

Technologies and Languages

- Languages & Core Web: TypeScript, JavaScript, Go, Node.js, HTML5, CSS3, ES6+
- Frameworks & State Management: React, Next.js, Redux, React Context, Spring Boot
- Data Visualization & UI Architecture: AG Charts, Highcharts, D3.js, MUI, Radix UI, Figma
- Testing & Automation: Cypress, Playwright, Jest, React Testing Library
- Tooling, Infrastructure & Databases: Vite, Webpack, Git, Docker, CI/CD Pipelines, REST APIs, MongoDB, RAG
